

# Waste One Environmental Policy

At Waste One, we are committed to protecting the environment and preserving natural resources for future generations. We recognize that our operations have an impact on the environment, and we are committed to reducing that impact through responsible waste management practices.

Our environmental policy is guided by the following principles:

1. Compliance with all applicable environmental laws and regulations.
2. Continuous improvement in environmental performance.
3. Prevention of pollution through the use of best available techniques and technologies.
4. Promotion of recycling, reusing, and reducing waste.
5. Encouraging the use of environmentally friendly products and services

We will also work with our suppliers and customers to promote environmental sustainability. We will encourage our suppliers to adopt environmentally friendly practices, and we will work with our customers to reduce the environmental impact of their waste.

Waste One is committed to being a responsible corporate citizen, and we will take all necessary steps to protect the environment and preserve natural resources for future generations. We believe that by working together, we can make a positive impact on the environment and create a sustainable future for all.

In order to ensure the effective implementation of this policy, it will be reviewed and updated on an annual basis. The management will ensure that the necessary resources are made available to implement and maintain the policy.

We will also, review our process and procedures to identify and eliminate any potential hazards, which may have an impact on the environment, and implement necessary preventive measures to minimize the risk.

In summary, Waste One is committed to protecting the environment and preserving natural resources for future generations through responsible waste management practices. We will comply with all applicable environmental laws and regulations, continuously improve our environmental performance, and promote recycling, reusing, and reducing waste. We will encourage the use of environmentally friendly products and services, and invest in new technologies to reduce the environmental impact of our operations. We will work with our suppliers and customers to promote environmental sustainability, and be transparent and open in our communication about our environmental performance.
